Bawah
RESERVE

ONE OF ASIA'S MOST SPECTACULAR TROPICAL ISLAND ENCLAVES

THE ANAMBAS ARCHIPELAGO IS A TRUE UTOPIA FOR DIVERS

Bawah Reserve is a boutique resort consisting of six pristine islands surrounded by spectacular underwater scenery. We have access to 13 dive sites, located either off our shores or just a short boat-ride away. We offer easy, relaxing diving, with vibrant shallow reefs and gentle currents.

As one of Indonesia's first marine conservation areas, Bawah features an abundance of flourishing coral reefs with vibrant marine life. We are proud to be part of the World Wildlife Fund's (WWF) Signing Blue Initiative, and our surrounding lagoons and reefs are marine conservation areas certified by WWF Indonesia.

We are a PADI-certified five-star diving centre with marine biologists on staff. While safety is always our first priority, our mission is to help children and adults fall in love with the ocean and the marine life in it.

WHAT TO EXPECT

Our dive sites have colourful shallow reefs, generally from two to six metres deep, that gently slope down to depths of 25 to 30 metres. We use **Scubapro** diving equipment and offer flexible diving schedules that help you make the most of your underwater experiences.

Fees for all dives and diving experiences include a donation and a marine park fee that goes towards the upkeep of the Anambas Marine Protected Area, or MPA.

PADI BUBBLE MAKER

3 M

6 M

12 M

18 M

30 M

The **PADI Bubblemaker Experience** is a fantastic way to introduce children up to 10 years of age to basic scuba diving skills.

It starts with a safety and theory briefing, where they learn to stay close to their instructors and what to do if they start to feel afraid or get water in their masks.

Once they are comfortable with this, we show them how to assemble their equipment, put it on and then – after practising these skills in our swimming pool – enter the safe, shallow reefs of our lagoon for a fun dive to a maximum depth of four metres. If they enjoy the experience and are comfortable we can then take them on additional fun dives from our custom dive boat on the outer reefs, again to a maximum depth of four metres. To ensure the highest standard of safety, each Bawah Reserve diving instructor teaches no more than two students at a time.

PROGRAMME DETAILS

What's included?

- 1.5 hours of instruction and skills practice
- 1 Fun Dive in our sheltered lagoon
- Use of Scubapro diving equipment

What do you need?

- To be at least 8 years old (for kids aged 10 years and older we offer the PADI Discover Scuba Diving programme)
- To be medically fit to dive

PADI DISCOVER SCUBA DIVING

3 M

6 M

12 M

18 M

30 M

PADI Discover Scuba Diving provides a taster before committing to a full diving course. It includes introductory theory training plus skills practice in our swimming pool to teach the basics of diving.

Your Bawah Reserve Dive Professional will cover all aspects of safety – both above and below the water – and teach you how to use the equipment correctly. Once you're competent, confident and ready to experience the magic of diving, you will accompany your instructor to one of the beautiful reefs around Bawah Reserve for a fun dive to a depth of no more than 12 metres.

PROGRAMME DETAILS

What's included?

- Introduction to Dive Theory
- 1.5 hours of instruction and skills practice
- 1 Fun Dive
- Use of Scubapro diving equipment
- Dive insurance

What do you need?

- To be at least 10 years old
- To be medically fit to dive

SCUBA REFRESHER

3 M

6 M

12 M

18 M

30 M

Our **Scuba Refresher** is designed to quickly reintroduce you to diving and boost your confidence by reinforcing your existing skills and dive knowledge.

Required for certified divers who haven't been diving for a year or longer, this short course includes a dive theory review as well as a practical guided session to refresh your dive techniques. After a discussion about your previous dive experiences we design the refresher around you. We tailor it to include aspects of diving that you may have struggled with in the past, so you feel completely confident with us. We review your skills and answer your questions before practising the skills and doing a mini dive in the sheltered waters of Bawah Reserve's lagoon.

PROGRAMME DETAILS

What's included?

- 1.5 hours of instruction and skills practice
- Use of Scubapro diving equipment
- Dive insurance

What do you need?

- To be medically fit to dive
- To hold a PADI Open Water Diver certification, or the equivalent from another agency

FUN DIVING

3 M

6 M

12 M

18 M

30 M

If you are a certified diver, you can get a proper introduction to Bawah's colourful and fascinating marine life on this **Fun Scuba Diving Experience**.

Suitable for beginners and seasoned divers alike, Fun Scuba Diving is the ideal way to experience the incredible underwater world surrounding Bawah Reserve. After a short 15-minute boat ride, you will enjoy exclusive access to pristine reefs and marine landscapes featuring amazingly rich marine biodiversity.

PROGRAMME DETAILS

What's included?

- A Fun Dive lasting either 60 minutes, or when tanks reach 50bar
- Boat fee
- Rental of Scubapro diving equipment
- Dive insurance

What do you need?

- To be at least 10 years old
- To hold and present evidence of PADI Open Water Diver certification, or the equivalent from another agency
- To have been diving or to have completed a Scuba Refresher within the past 12 months
- To be medically fit to dive

NIGHT DIVING

3 M

6 M

12 M

18 M

30 M

Experience the thrill of **Night Diving** here at Bawah Reserve. Night diving offers a totally different perspective on any dive site you may have experienced during the day.

By showcasing underwater life that is well hidden while the sun is in the sky, night diving offers wonderful insights into the reef after dark. You will commonly see coral feeding, plus crabs, shrimp, moray eels, nudibranchs and other invertebrates roaming their territory; even the glow of bioluminescent plankton. The incomparable mystery and calm of a night dive is an unforgettable experience for any diver.

Night diving is available to anyone with a PADI (or equivalent) Advanced Open Water certification. If you only have an

Open Water certification you may join a Night Dive as part of a PADI Adventure Dive, or your PADI Advanced Open Water Course.

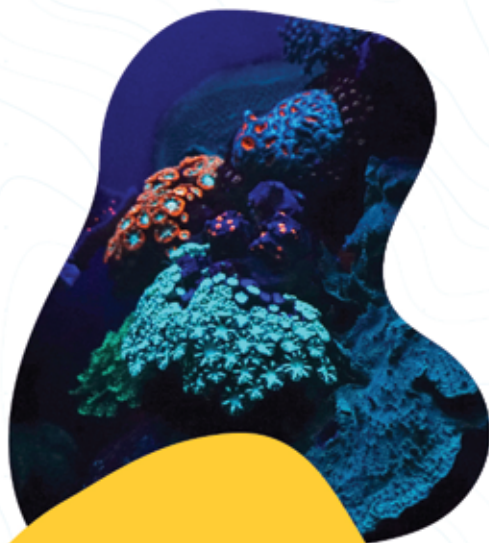

PROGRAMME DETAILS

What's included?

- A Night Dive lasting either 60 minutes, or when tanks reach 50bar
- Boat fee (for local boat dives)
- Use of Scubapro diving equipment
- Dive torch
- Dive insurance

What do you need?

- To be at least 12 years of age
- To be medically fit to dive
- To hold and present evidence of PADI Advanced Open Water Diver certification, or the equivalent from another agency
- To have been diving or to have completed a Scuba Refresher course within the past 12 months

SEE CORAL AND MARINE CREATURES IN A NEW LIGHT!

Discover vibrant hidden hues with the aid of UV lighting. Bawah offers **Fluro Dives** and **Guided UV Night Snorkelling**, unveiling our lagoons' vivid nocturnal colours.

Pricing and full details can be found at the back of this brochure.

DPV DIVING

3 M

6 M

12 M

18 M

30 M

Embark on an exciting journey where marine beauty meets innovation. A **DPV (Diver Propulsion Vehicle)**, also known as an underwater scooter, can enhance exploration, conserve air and boost speed, all with a huge smile on your face.

ENJOY MORE FREEDOM OF MOVEMENT

Experience new-found underwater freedom with DPV. Glide past marine wonders without strenuous swimming, covering more sites in less time. Cruise effortlessly with sea turtles and vibrant fish.

PRESERVE THE ECOSYSTEM

Efficient propulsion minimises impact on delicate marine environments. Responsible diving preserves ocean life for the future.

MAXIMISE DIVE TIME

Save energy, explore more caves, hidden treasures and rare species.

CREATE MEMORABLE GROUP EXPERIENCES

Share the excitement of zooming through the water together, capturing stunning underwater footage with fellow adventurers.

SUITABLE FOR ALL LEVELS

DPV provides added confidence and support to new divers, making it easier to keep pace with your instructor and fellow divers. Experienced divers will appreciate the added thrill and versatility that the DPV brings to their underwater escapades.

TAKE OUR DPV DIVING COURSE

- Have a lot of fun.
- See more in less time.
- Minimise long swims.
- Learn about different types of DPVs.
- Learn how to handle DPV.
- Manage your depth.

Pricing and full details can be found at the back of this brochure.

ISLAND DIVING ADVENTURES

3 M

6 M

12 M

18 M

30 M

Embark on a journey of discovery with an **Island Diving Adventure** to pristine, lesser known dive sites in the Anambas Islands. Dive into untouched underwater worlds teeming with vibrant marine life and breathtaking vistas.

As part of this exclusive experience, you'll explore carefully selected dive sites, including Kiabu Island, Mengkait, Telaga, and Tokong Malangbiru. These hidden gems offer stunning underwater scenery, diverse marine biodiversity and encounters with rare sea creatures. For those with specific sites in mind, personalised dive itineraries can be arranged for a bespoke adventure.

Each day trip includes two or three dives, tailored to your preferences and diving goals. With small group sizes and a minimum of two divers required, the experience remains intimate and immersive. Departing at 7 am, you'll have ample time to fully explore each location, with travel times to dive sites kept under two hours for maximum underwater exploration.

PROGRAMME DETAILS

What's included?

- All essential diving equipment
- On board breakfast, lunch, snacks and coffee
- Option to include alcoholic beverages ⁵
- Integration with PADI certification courses (subject to approval)
- Minimum of two divers

What do you need?

- To be at least 12 years of age
- To be medically fit to dive
- To hold and present evidence of a PADI Advanced Open Water Diver certification, or the equivalent from another agency
- To have been diving or to have completed a Scuba Refresher course within the past 12 months

Pricing includes a base rate with additional charges based on site travel distance

MARINE CONSERVATION DIVING

3 M

6 M

12 M

18 M

30 M

(from: [Wikipedia](#))

Marine Conservation is vital to the continued health of our planet and is something that we at Bawah Reserve are very passionate about.

This programme is all about the threats that underwater ecosystems face and gives you practical experience in our marine conservation efforts. All marine conservation dives are preceded by a 45-minute presentation from one of our qualified marine biologists.

CORAL TRANSPLANTING

Make your dive count! Although the majority of coral reefs surrounding Bawah Reserve are flourishing, a few areas have been affected by decades of unsustainable fishing. Our marine biologists have identified the reefs most in need of repair, and our dive guests are now invited to actively participate in repopulating them with healthy coral from our coral nursery.

REEF HEALTH MONITORING

This educational dive programme is designed to enhance your knowledge of coral reefs while you learn how to help them remain healthy for future generations. You will learn survey techniques and then participate in a survey at one of our seven sites.

UNDERWATER CLEAN-UP

Join our dive team and assist with our marine conservation efforts. This dive will include searching for and removing man made debris such as drift nets and plastic items that have floated onto our reefs on water currents.

MARINE CONSERVATION ADOPTION

The underwater world is a marvel of fascinating ecosystems teeming with a rich variety of vibrantly coloured marine plants and sea creatures. At Bawah Reserve, we believe wholeheartedly in marine conservation and are doing all we can to protect the Anambas reefs.

For guests who share our commitment to marine conservation, we offer adoption programmes that give you the opportunity to directly influence and support this work.

ADOPT A TURTLE NEST

To protect our local population of turtle nests we patrol and relocate freshly laid eggs in our purpose-built nest enclosure where we can defend them against poachers and other predators.

By adopting one of our turtle nests, you will be supporting our efforts to increase the local population of these endangered creatures. We will send you information on the number and species of successful hatchlings, plus photos of the miraculous event.

USD \$200 (season-dependent)**

ADOPT A CORAL TREE NURSERY

Coral trees are safe spaces where threatened coral fragments from our local reefs receive the nutrients they

**DONATIONS
CAN BE ADDED
TO YOUR FINAL
BILL.**

need to grow and thrive. After maturing they are transplanted onto a natural or artificial reef structure by one of our marine conservation divers (that could be you!), where they continue to grow.

USD \$300+ p/year

ADOPT A CORAL SPIDER OR BEER BOTTLE REEF

Coral spiders are stainless steel frames that help rebuild reefs where they have been damaged. We attach coral fragments to the metal structure, and fish are able to swim through the gaps. As the coral grows, it starts to spread out and will eventually envelop the metal. Bottle reefs are a sustainable way to rebuild reefs. They're made from recycled beer bottles on a concrete base. These materials will take thousands of years to decompose, giving the coral a chance to grow and cover the surrounding area.

**USD \$350 single unit p/year or
\$1,500 whole site p/year**

ADOPT A HEXADOME

Hexadomes are artificial reef structures for rehabilitating damaged reefs. They form a three-dimensional landscape on the previously bare reef, provide a stable substrate and large surface area on which corals and other organisms can settle and grow rapidly leading them to become refuges for fish and other sea creatures. The domes will last for many years - long enough for the natural reef to recover.

**USD \$750 single unit p/year or
\$2,500 whole site p/year**

TURTLE SATELLITE TAGGING

Our marine conservation team plans to become the first group in the Riau islands to utilise GPS technology to tag and track the movements of endangered hawksbill and green turtles.

This tagging programme would allow our marine biologists to monitor the turtles' movements. This could help to identify the key foraging sites of Bawah's sea turtles and the subsequent expansion of Marine Protected Areas to support their continuing conservation.

As an adopter, you would be able to name your turtle, have access to the Argos Satellite System so as to track its movements and be updated on the impact of the research. Just imagine the satisfaction of supporting such a worthwhile project!

USD \$4,000

MARINE CONSERVATION HEROES EXPERIENCES

3 M
6 M
12 M
18 M
30 M

PRE-ARRIVAL BOOKING REQUIRED!

This bespoke and exclusive Marine Conservation Experience requires advance booking and planning to ensure availability. Please contact our Dive Centre at divemgr@bawahreserve.com to discuss your preferred dates and activities to receive a detailed quote.

Take part three unique **three-day Marine Conservation Heroes Experiences** blending Bawah's natural beauty with marine conservation. Join our marine biologists in restoring coral, monitoring our reefs, or protecting our turtles, creating unforgettable memories while making a lasting impact in our oceans.

CORAL REEF RESTORATION EXPERIENCE

This is a unique opportunity to take part in the renewal of fragile coral ecosystems. After an introductory session on coral health and artificial reef building, you will spend Day 1 creating your own artificial reef unit. On Day 2, you will dive to collect coral fragments that have naturally broken off. These will be introduced to our reef nurseries for rehabilitation.

The final day culminates with the deployment of new reef structures, along with the transplanting of nursery-grown corals into damaged reef areas. This immersive experience includes four dives, giving you the chance to make a lasting impact. For a full year, you will receive progress updates on the reefs you helped restore.

PROGRAMME DETAILS

What's included?

- 3 day programme
- 4 marine conservation dives
- 1 year of progress updates

What do you need?

- To be at least 12 years of age
- To be medically fit to dive
- To hold and present evidence of a PADI Open Water Certification and at least 10 logged dives

Price (per person)

- IDR 25 million ** / USD \$1,500**

REEF HEALTH MONITORING & CORAL PREDATOR REMOVAL HERO EXPERIENCE

**PRE-ARRIVAL
BOOKING REQUIRED!**

This bespoke and exclusive Marine Conservation Experience requires advance booking and planning to ensure availability. Please contact our Dive Centre at divemgr@bawahreserve.com to discuss your preferred dates and activities to receive a detailed quote.

For divers interested in the science of reef preservation, our Reef Health Monitoring and Coral Predator Removal programme offers an in-depth look at coral health and fish biodiversity. This experience begins with a coral health monitoring dive, where participants document the reef through underwater photography. Day 2 shifts focus to biodiversity, as guests dive to catalogue fish species, followed by an exciting night dive to safely remove the crown of thorns starfish, a known coral predator.

On the final day, you will analyse your collected data with our marine biologists, understanding how they contribute to long-term reef health. This programme includes three dives and is perfect for divers keen on actively protect Bawah's vibrant reefs.

PROGRAMME DETAILS

What's included?

- ~ 3 day programme
- ~ 3 marine conservation dives, including 1 night dive

What do you need?

- ~ To be at least 12 years of age
- ~ To be medically fit to dive
- ~ To hold and present evidence of a PADI Open Water Certification and at least 10 logged dives

Price (per person)

- ~ IDR 20 million ** / USD \$1,300**

TURTLE CONSERVATION HERO EXPERIENCE

3 M

6 M

12 M

18 M

30 M

PRE-ARRIVAL BOOKING REQUIRED!

This bespoke and exclusive Marine Conservation Experience requires advance booking and planning to ensure availability. Please contact our Dive Centre at divemgr@bawahreserve.com to discuss your preferred dates and activities to receive a detailed quote.

If you love sea turtles, this experience is a rare opportunity to protect and study these majestic creatures. After an overview of their life cycle and the threats they face, you will join an early morning beach patrol to monitor nesting sites and, if needed, relocate nests to safety. During the day, you will dive or snorkel with Diver Propulsion Vehicles (DPVs) to locate and photograph turtles for identification,

contributing to our ongoing research database. Day 2 offers another turtle identification dive or snorkel, and an evening beach patrol to observe nesting turtles and assist with data collection. On the final day, you will learn to identify individual turtles using our software, adding your findings to our conservation records.

PROGRAMME DETAILS

What's included?

- 3 day programme
- 2 marine conservation dives or snorkelling with a DPV scooter
- Option to earn PADI DPV Specialty Certification

What do you need?

PADI OPEN WATER DIVER

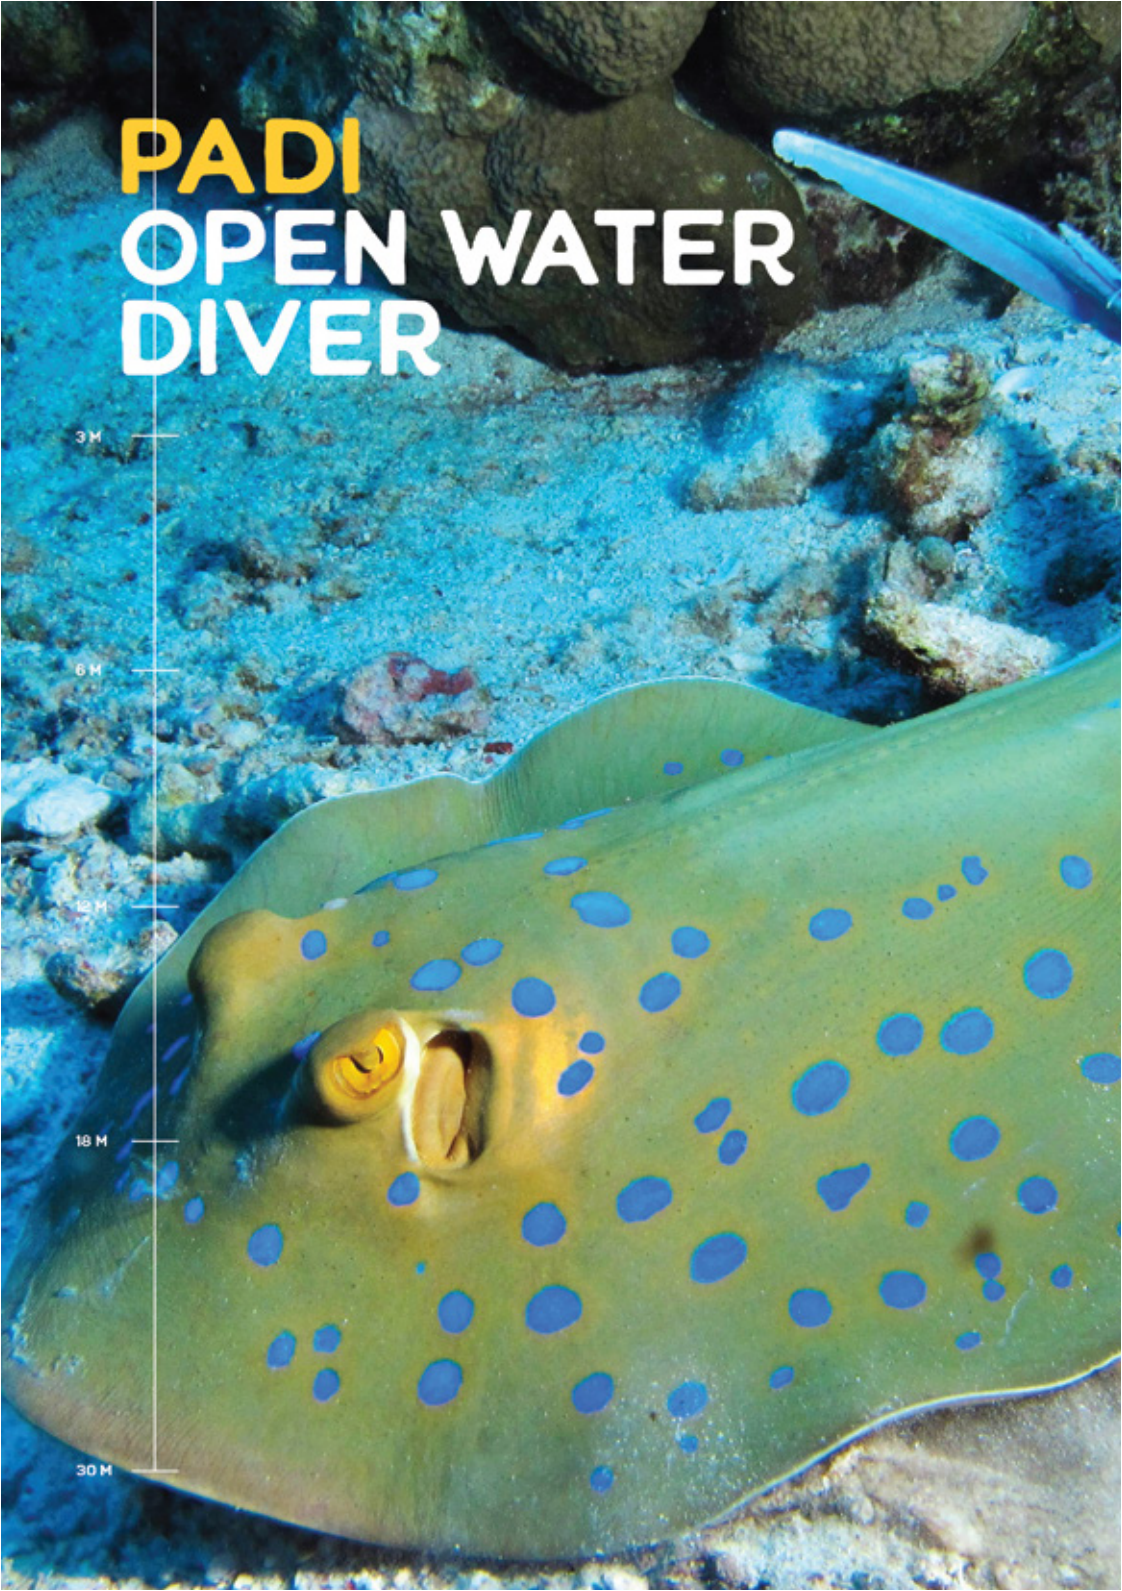

3 M

6 M

12 M

18 M

30 M

If you want to dive, this is where it starts!

The **PADI Open Water** certification course is the first step towards discovering the spectacular marine ecosystem beneath the waves.

This performance-based course will provide you with the skills to dive – not only around Bawah Reserve, but at diving spots all over the world.

PART 1

Theory (e-Learning)

You will learn the major aspects of diving theory, diving equipment and diving skills. To save precious time, this part of the course can be completed before you come to Bawah.

PART 2

Skills Practice & In-Water Training

Having studied the theory behind safe diving, you will join a Bawah Reserve Dive Instructor in shallow water to learn the skills needed for open water dives.

PART 3

Open Water Dives

Now we move to deeper water over 4 dives, culminating in an open water dive to a maximum of 18 metres, where you will demonstrate your mastery of skills learnt in the shallow water and utilise the confidence you have developed through the course to relax and enjoy the underwater scenery.

PROGRAMME DETAILS

What's included?

- Theory training (with PADI e-Learning materials)
- 3 days of water-based training, including 1 day in the shallows, and 2 days with 2 dives per day (depending on weather and competency)
- Use of Scubapro diving equipment
- Dive insurance
- Dive log book
- PADI Open Water certification (allows you to dive to a maximum of 18 metres)

What do you need?

- To be at least 10 years old (if under 15 years old you will receive a PADI Junior Open Water certification)
- To be medically fit to dive
- To be able to swim: you will need to pass a 200-metre swim test or a 300-metre snorkel test during the course
- To be able to float for 10 minutes in water too deep to stand in

PADI ADVENTURE DIVES

3 M

6 M

12 M

18 M

30 M

These are for divers certified to Open Water level who want to do a more advanced type of dive, but do not yet want to do the Advanced course or take a speciality.

Each adventure dive counts towards one dive from the Advanced course or relevant speciality. Doing an adventure dive can count towards the Advanced course, or towards a speciality course that you do here or somewhere else in the future, valid for one year.

Please contact our dive team directly for more information on any of the adventure dives listed below.

We offer the following adventure dives:

- Drift Diving
- Digital Underwater Imaging
- Peak Performance Buoyancy
- Search and Recovery
- Fish Identification
- Underwater Naturalist
- Night Diving
- Deep Diving
- Underwater Navigation

PROGRAMME DETAILS

What's included?

- 3 hours of independent study
- 1 hour of information and instruction
- 1 Adventure Dive

What do you need?

- Open Water certification
- To be medically fit to dive

An underwater photograph of a vibrant coral reef teeming with a large school of orange fish. The scene is set against a clear blue background. On the right side, a vertical white line with horizontal tick marks indicates depth levels. The text 'PADI ADVANCED OPEN WATER DIVER' is overlaid in the upper left quadrant.

PADI ADVANCED OPEN WATER DIVER

3 M

6 M

12 M

18 M

30 M

The **PADI Advanced Open Water Diver** course increases your competence and confidence by expanding your dive theory knowledge and building your skills.

PART 1

Theory (e-Learning)

You will learn about adventure dives, including the practical aspects and physiological effects of deeper scuba diving and how to navigate using water compasses, kick cycles, visual landmarks and time. You will also learn how to use your dive computer more effectively.

To save time, this part of the course can be completed before arriving at Bawah.

PART 2

Open Water Adventure Dives

This performance based course includes five adventure dives, of which two must be adventure dives that focus on deep scuba diving and navigation skills. For the other three dives, you can choose from:

- ~ Drift Diving
- ~ Digital Underwater Imaging
- ~ Peak Performance Buoyancy
- ~ Search and Recovery
- ~ Fish Identification
- ~ Underwater Naturalist
- ~ Night Diving

PROGRAMME DETAILS

What's included?

- ~ Theory training (PADI e-Learning materials)
- ~ 5 dives over 2-3 days (depending on weather and competency)
- ~ Use of Scubapro diving equipment
- ~ Dive insurance
- ~ PADI Advanced Open Water Diver certification

What do you need?

- ~ To be at least 15 years old (if under 15 years old you will receive a PADI Junior Advanced Open Water certification)
- ~ To be medically fit to dive
- ~ PADI Open Water certification, Junior Open Water certification, or equivalent certification from another organisation

PADI SPECIALITIES

3 M

6 M

12 M

18 M

30 M

DISCOUNT FOR MULTIPLE SPECIALTY DIVES

If you would like to combine specialities (e.g. Peak Performance Buoyancy and Digital Underwater Imaging), a discount will be given. Please contact divemgr@bawahreserve.com for details.

PADI Specialities are a great way to increase your confidence and add more dimensions to your scuba diving.

With these courses you are going to increase your diving knowledge and experience and learn new ways to enjoy your dives.

PADI Specialities are the first steps to PADI Master Diver certification. If you complete 5 specialities and your PADI Rescue Course you can apply to become a PADI Master Diver!

At Bawah Reserve, we currently offer five specialities:

- Peak Performance Buoyancy (2 dives)
- Night Diver (3 dives)
- Digital Underwater Imaging (2 dives)
- Deep Diver (4 dives)
- DPV Diving (2 dives)

PEAK PERFORMANCE BUOYANCY

Perfect buoyancy is the hallmark of a skilled diver. Learn to glide effortlessly, and to ascend and descend as if by thought. Practise your buoyancy over this two-dive course and take your skills to the next level.

NIGHT DIVER

Experience the joy of diving during the hours of darkness. Learn techniques to keep you feeling comfortable and safe underwater at night, and then marvel at all the wondrous creatures that hide themselves from sight during the day. From crabs to bioluminescent plankton, night diving offers incredible experiences. If you're especially lucky, you may even see coral spawning, which has been described as a once-in-a-lifetime experience!

DIGITAL UNDERWATER IMAGING

If your underwater photos tend to be blue and blurry, this is the course for you! Learning different techniques will allow you to find the right subject, positioning and composition for your photos.

DEEP DIVER

Ever wanted to see what's down there in the deep blue water? With this speciality, you will discover the preparation and planning required to deal with the pressure changes associated with deep diving, together with procedures that ensure a safe descent and ascent. You will learn how to dive safely to 40 metres.

PADI RESCUE DIVER

6 M

12 M

18 M

30 M

Scuba divers have described the **PADI Rescue Diver** course as the most challenging, yet most rewarding, course they've ever taken. Learning various methods of rescuing both yourself and others makes you a more self-sufficient, knowledgeable and experienced diver.

This course is perfect for those who want to help others. For those considering a career in the diving industry, it is also a prerequisite for both Divemaster and Instructor courses.

PART 1

Theory (e-Learning)

Here you will learn the fundamentals of self-rescue, diver rescue, accident prevention and stress management during an emergency situation. To make the most of your time with us, this part of the course can be completed before arrival at Bawah.

PART 2

Skills Practice & In-Water Training

After completing your e-Learning, you will perform 10 rescue exercises in the water with a Bawah Reserve Dive Instructor. During this time, you must successfully prove your competence in rescuing yourself and others.

PART 3

Open Water Exercises & Rescue Scenarios

You will be placed in two simulated scenarios where you will rescue other divers in the ocean.

PROGRAMME DETAILS

What's included?

- ~ Theory training (PADI e-Learning materials)
- ~ 2-3 days of water-based training, including 10 rescue skills in both shallow and open water, plus 2 rescue scenarios in open water
- ~ Use of Scubapro diving equipment
- ~ Dive insurance
- ~ PADI Rescue Diver certification

What do you need?

- ~ To be at least 12 years old (if under 15 years old you will receive a PADI Junior Rescue Diver certification)
- ~ To be medically fit to dive
- ~ EFR Primary and Secondary Care training completed within the last 24 months (this can be completed along with the Rescue Diver course)

PADI EFR COURSE

3 M

6 M

12 M

18 M

30 M

PADI Emergency First Response (EFR)

teaches the skills required to respond to a medical emergency. In line with international guidelines, the course teaches simple steps to respond to emergencies and does so in a non-stressful learning environment.

You will learn both primary and secondary care skills, including:

- Primary assessment
- Cardiopulmonary resuscitation (CPR)
- Serious bleeding, shock and spinal injury management
- Conscious and unconscious choking management
- Injury and illness assessment
- Bandaging and splinting dislocations and fractures

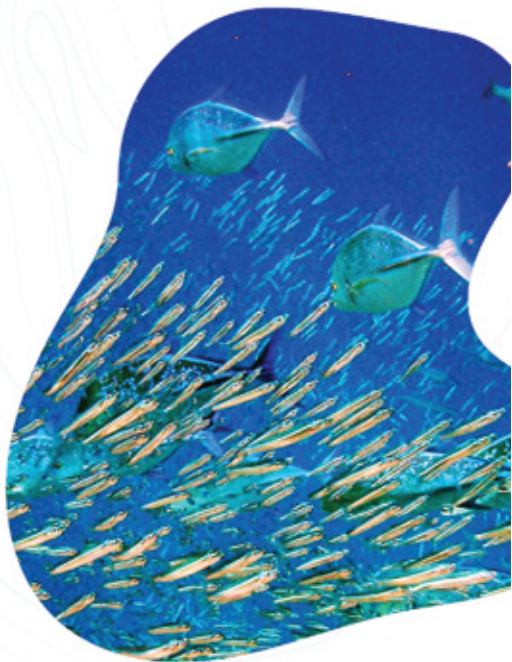

PROGRAMME DETAILS

What's included?

- 6 hours of instruction
- Online EFR Primary and Secondary Care Manual
- EFR Primary and Secondary Care Certification E-Card

What's included?

- No minimum age, but we recommend 12 years or older
- Online EFR Primary and Secondary Care Manual

GUIDED SNORKELS

Snorkelling is a great aquatic experience at Bawah Reserve due to the beauty of our reefs and a wide array of marine species including 253 types of fish and 63% of the corals endemic to Indonesia. Get expert insights from our snorkelling guides.

GUIDED SNORKEL SAFARI

New to snorkelling or want guided exploration? Join our Activity Team for daily guided snorkels where you'll learn absorbing facts about the behaviour and diets of the marine species in our waters.

PRIVATE GUIDED SNORKEL ⁽⁵⁾

Go deeper when you join a guided boat excursion where you and your family can explore snorkel spots beyond our house reef. Book it via the Activity Centre.

NIGHT SNORKEL SAFARI ⁽⁵⁾

Another world awaits after sundown. Join our team to explore our reef in a new light. Special UV torches will reveal the stunning underwater hues of fluorescent green, red, orange and yellow emitted at night. Night snorkelling offers a chance to experience coral feeding (and spawning - if you're lucky!) and to see nocturnal animals that are hidden during the day.

SNORKEL LIKE A PRO!

Want to get some fantastic shots of your snorkel excursion? Hire one of our GoPro cameras to capture even more holiday memories.

Pricing can be found at the back of this brochure.

DPV USAGE TERMS

For Non Certified Scuba Divers

- Guests can also try a DPV dive during subsequent dives after completing a Discover Scuba Diving (DSD) Experience, with approval and when accompanied by one of our PADI Instructors.

For Certified Scuba Divers

- Certified Divers without a DPV certification may try a DPV during a fun dive under the supervision of one of our PADI Professionals.
- If guests wish to upgrade and complete the PADI DPV Specialty, one of their DPV fun dives can count towards the subsequent specialty, if taken during the same visit to Bawah

Certified DPV Divers

- Rent DPV for one or two dives (guide ratio of two divers to one guide).

DPV Specialty Certification

- Obtain DPV certification in one day (two dives) with e-Learning through PADI (inc. DPV rental).

For Snorkellers

- Snorkellers who accompany boat divers or our Activities Team may rent a DPV without certification. Snorkellers will be accompanied by a guide at a ratio of two snorkellers to one guide.

DISCOUNTS

We offer multiple dive discounts:

- 5% off for 5 or more dives
- 10% for 10 or more dives
- 10% for 2 or more courses

TERMS AND CONDITIONS

Advance reservations are recommended.
Dive times are subject to change.

*Fees are charged in Indonesian rupiah millions (IDR) at prevailing currency conversion rates and subject to 21% tax and service.

**USD \$ conversion is an estimate based on an exchange rate of IDR 16,000 to US\$1.
